Joshua **Wong**

Architecture & Building Technology Student

Vancouver, BC, Canada

(+1) 778-966-3088 | wjosh8857@gmail.com | joshua-c-wong

Summary

Architecture & Building Technology student at BCIT with a strong foundation in digital modeling and structural drafting. Proficient in AutoCAD and Revit, with experience creating precise technical documentation and building accurate models from site data. Passionate about mastering software workflows and applying BIM technologies to deliver highly accurate, constructible models for complex projects.

Education

British Columbia Institute of Technology (BCIT) — *Burnaby, BC*

Dip.T. in Architectural & Building Technology — *Expected Grad. May. 2027*

- **Relevant Courses:** Architectural CAD, Autodesk Revit 1, Construction Estimating, Building Construction 2, Construction Materials & Processes
- **Hounours & Awards:** RDH Building Science Academic Award (Nov. 2026)

British Columbia Institute of Technology (BCIT) — *Burnaby, BC*

Structural CADD & Graphics — *Sept. 2024 - Jun. 2025*

- **Relevant Courses:** Building Code, Construction Drawings, Intro to CAD Drafting, Structural Steel Design, Structural Graphics, Structural Revit

Work Experience

Klohn Crippen Berger — *Vancouver, BC*

Structural Drafting Technologist Practicum — *Mar. 2025 - Mar. 2025*

- Streamlined the quality assurance process by reviewing structural plans for compliance with municipal bylaws and project specifications.
- Conducted rigorous technical checks on multi-sheet drawing sets to verify design accuracy, ensuring high standards for final submissions.
- Mastered industry-standard construction documentation practices and project workflows while collaborating within a multidisciplinary team.

Proper Measure — *Victoria, BC*

As-Built Drafting Technician — *Apr. 2024 - Aug. 2024*

- Drafted 10-15 comprehensive AutoCAD floor plans weekly, utilizing advanced laser tools to capture precise 1:1 on-site interior dimensions.
- Generated over 50 immersive virtual property tours monthly using Matterport 3D scanning technology for enhanced interactive site visibility.
- Systematically updated existing property floor plans to accurately reflect recent interior renovations and strict client design specifications.

Canadian Tire — *Victoria, BC*

Warehouse Associate — *Oct. 2022 - Mar. 2024*

- Maintained inventory integrity and prevented operational delays by meticulously verifying incoming shipments against manifest labels.
- Optimized material retrieval and minimized workplace hazards by systematically organizing stock and adhering to strict safety protocols.
- Sustained an efficient daily workflow in a fast-paced environment by collaborating with team members to meet tight processing deadlines.

Projects

Revit API & Automation Tool | Dynamo, Python, Revit — *June. 2026*

- Engineered a Dynamo and Python script to automate batch-generation of Revit sheets, eliminating manual entry and saving setup hours.
- Integrated external Excel tracking spreadsheets directly into the Revit database to auto-assign parameters, ensuring 100% data consistency.
- Programmed robust error-handling logic within the Python code to bypass empty datasets, preventing crashes and ensuring workflow stability.

Conceptual Design to BIM Integration Project | AutoCAD, Revit — *Jan. 2025*

- Drafted comprehensive 2D technical drawings in AutoCAD by translating complex virtual geometry into precise floor, roof, and elevation plans.
- Translated virtual design elements into constructible real-world metrics by determining ceiling heights and structural wall span distances.
- Constructed a comprehensive 3D BIM model in Revit using the initial 2D drafts to visualize intricate spatial relationships and building massing.

Structural Tilt-Up Quality Check | AutoCAD — *Feb. 2025*

- Performed a detailed quality assurance audit on a multi-sheet AutoCAD drawing package for a concrete tilt-up building to verify plan accuracy.
- Analyzed the structural drawing set to detect critical design discrepancies, ensuring all components met building standards for construction.
- Cross-referenced floor plans, elevations, and structural connection details to ensure strict consistency across the entire drawing package.

Technical Skills

Drafting & BIM	AutoCAD (2D/3D), Revit (Architecture/Structure), Dynamo BIM, Civil 3D
Document Control	Bluebeam Revu (Markup & QC), Microsoft Office Suite (Teams, Excel, Word)
