Joshua **Wong**

Architecture & Building Technology Student

Vancouver, BC, Canada

(+1) 778-966-3088 | wjosh8857@gmail.com | My Portfolio | joshua-c-wong

Summary

Architecture & Building Technology student at BCIT with a strong foundation in digital modeling and structural drafting. Proficient in AutoCAD and Revit, with experience creating precise technical documentation and building accurate models from site data. Passionate about mastering software workflows and applying BIM technologies to deliver highly accurate, constructible models for complex projects.

Education

British Columbia Institute of Technology (BCIT) — *Burnaby, BC*

Dip.T. in Architectural & Building Technology — *Expected Grad. May. 2027*

- **Relevant Courses:** Architectural CAD, Autodesk Revit 1, Construction Estimating, Building Construction 2, Construction Materials & Processes
- **Honors & Awards:** RDH Building Science Academic Award (Nov. 2026)

British Columbia Institute of Technology (BCIT) — *Burnaby, BC*

Structural CADD & Graphics — *Sept. 2024 - Jun. 2025*

- **Relevant Courses:** Building Code, Construction Drawings, Intro to CAD Drafting, Structural Steel Design, Structural Graphics, Structural Revit

Work Experience

Klohn Crippen Berger — *Vancouver, BC*

Structural Drafting Technologist Practicum — *Mar. 2025*

- Reviewed structural plans for compliance with municipal bylaws and project specifications, supporting the team's quality assurance process.
- Checked multi-sheet drawing sets for errors and inconsistencies, flagging issues and inconsistencies to ensure accuracy before final submission.
- Gained hands-on experience with construction documentation standards and project workflows while working with a multidisciplinary team

Proper Measure — *Victoria, BC*

As-Built Drafting Technician — *Apr. 2024 - Aug. 2024*

- Drafted 10-15 comprehensive AutoCAD floor plans weekly, utilizing advanced laser tools to capture precise 1:1 on-site interior dimensions.
- Generated over 50 immersive virtual property tours monthly using Matterport 3D scanning technology for enhanced interactive site visibility.
- Systematically updated existing property floor plans to accurately reflect recent interior renovations and strict client design specifications.

Canadian Tire — *Victoria, BC*

Warehouse Associate — *Oct. 2022 - Mar. 2024*

- Maintained inventory integrity and prevented operational delays by verifying shipments against manifests and systematically organizing stock.
- Sustained an efficient daily workflow in a fast-paced environment by collaborating with team members and following strict safety protocols.

Projects

Wall Assembly Condensation Calculator | Excel — *Nov. 2026*

- Developed an Excel calculator to model vapour diffusion through custom wall assemblies across 19 Canadian cities, driven by dropdown inputs.
- Automated temperature and vapour-pressure gradients using city climate data, ASHRAE indoor temperatures, and occupancy-based humidity.
- Programmed logic to locate the condensation plane within each wall assembly and calculate total moisture accumulation in kg/m^2 each month.

Revit API & Automation Tool | Dynamo, Revit, Excel — *June. 2026*

- Developed a custom Dynamo script to batch-generate Revit sheets, eliminating manual data entry and saving hours of repetitive sheet setup.
- Linked external Excel tracking spreadsheets directly to the Revit database to auto-assign sheet parameters, ensuring 100% data consistency.
- Programmed error-handling logic in Python to bypass empty datasets, preventing script crashes and ensuring a stable, repeatable workflow.

Conceptual Design to BIM Integration Project | AutoCAD, Revit — *Jan. 2025*

- Drafted comprehensive 2D technical drawings in AutoCAD, translating complex virtual geometry into precise floor, roof, and elevation plans.
- Converted virtual design elements into constructible real-world metrics by determining ceiling heights and structural wall span distances.
- Constructed a comprehensive 3D BIM model in Revit from initial 2D drafts to visualize intricate spatial relationships and building massing.

Technical Skills

Drafting & BIM	AutoCAD (2D), Revit (Architecture/Structure), Dynamo BIM, Civil 3D
Document Control	Bluebeam Revu (Markup & QC), Microsoft Office (Teams, Excel, Project, Word)
